2. Authorization for this examiner's amendment was given in a telephone interview with Donald W. Hanson (Registration No. 27,133) on August 19, 2009.

The application has been amended as follows:

(A) In the **claims**:

- a) In claim 18, the last line, after "transparent" delete [substitute] and insert --substrate--.
- b) In claim 19, the last line, after "transparent" delete [substitute] and insert --substrate--.
- c) In claim 20, the last line, after "transparent" delete [substitute] and insert --substrate--.
- d) In claim 21, the last line, after "transparent" delete [substitute] and insert --substrate--.

REASONS FOR ALLOWANCE

3. Claims 4, 5 and 18 – 25 are allowed.

4. The following is an examiner’s statement of reasons for allowance:

The prior art of record does not teach or suggest, either singularly or in combination, at least the limitation of a transparent conductive multi-layer structure comprising a smooth base, a transparent conductive layer, an auxiliary electrode layer, a transparent substrate, an adhesive layer, and the auxiliary electrode layer comprising a first auxiliary electrode layer formed on the transparent conductive layer and a second auxiliary electrode layer formed on the first auxiliary electrode layer and the first auxiliary electrode layer comprising at least one selected from fine carbon particles, fine ruthenium particles and fine ruthenium oxide particles and a binder component, and a second auxiliary electrode layer comprising fine metal particles and a binder component (claim 4); the transparent conductive multi-layer structure further comprises a transparent coat layer over the auxiliary electrode layer and the transparent conductive layer at its areas not covered with the pattern-shaped auxiliary electrode layer and beneath the adhesive layer (claim 5), the adhesive layer is mixed with at least one additive selected from an ultraviolet absorber, a dehydrating agent and a deoxidizer (claim 8), and from said transparent conductive multi-layer structure, the smooth base material has been peeled off to have the transparent conductive layer and the auxiliary electrode layer which are joined to the transparent substrate through the adhesive layer (claims 18 – 24). Su et al. (U. S. Pat. No. 6,621,215), Seo (U. S. Pub.

No. 2003/0,215,651) and Bommarito et al. (U. S. Pat. No. 5,825,526) teach a transparent conductive multi-layer structure comprising a smooth base, a transparent conductive layer, an auxiliary electrode layer, a transparent substrate, and an adhesive layer. However, Su et al., Seo and Bommarito et al. do not teach the auxiliary electrode layer comprising a first auxiliary electrode layer formed on the transparent conductive layer and a second auxiliary electrode layer formed on the first auxiliary electrode layer and the first auxiliary electrode layer comprising at least one selected from fine carbon particles, fine ruthenium particles and fine ruthenium oxide particles and a binder component, and a second auxiliary electrode layer comprising fine metal particles and a binder component as set forth in claim 4, the transparent conductive multi-layer structure further comprises a transparent coat layer over the auxiliary electrode layer and the transparent conductive layer at its areas not covered with the pattern-shaped auxiliary electrode layer and beneath the adhesive layer as set forth in claim 5, the adhesive layer is mixed with at least one additive selected from an ultraviolet absorber, a dehydrating agent and a deoxidizer as set forth in claim 8, and from said transparent conductive multi-layer structure, the smooth base material has been peeled off to have the transparent conductive layer and the auxiliary electrode layer which are joined to the transparent substrate through the adhesive layer as set forth in claims 18 – 24.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
